- Proposed Wilderness
- Existing Wilderness
- US Forest Service
- State or County
- Non-National Forest
- Roads
- Trails
- Perennial Stream
- - - Intermittent Stream
- ⋯ USGS 24x Quadrangle Boundaries

- 300' Setback From Edge of Highway or Freeway
- - - 100' Setback From Edge of Road
- ⋯ 30' Setback From Edge of Road
- 300' Beyond High Water Mark of River
- - - 100' Beyond High Water Mark of Perennial Stream
- ⋯ 30' Beyond High Water Mark of Intermittent Stream
- ⋯ CL: Center Line of River or Stream
- 300' Setback From Edge of Developed Corridor
- - - 300' Setback From Edge of Major Utility Corridor
- ⋯ 100' Setback From Edge of Minor Utility Corridor

The edge of a road is defined as the outermost portion of the roadbed including all associated outfalls, gutters, storm overflows and ditches.

The intent is to include the entire stream or river within wilderness with the exception of boundaries designated by CL. Stream and river setbacks are superseded by road setbacks.
